- 7 yrs Java Experience, Full stack developer
- I am interest in any kind of new technolgoy

Experience:

Senior developer

Blackhawk network

October 2015 - March 2017 • 1yr 5mos • Pleasanton , CA

- Design implement gift card inventory
 - Use REST, Spring data, Spring Boot to create inventory processing service pull card from various external card sources and save the card in database.
 - Implement inventory dataload service to manage card load status.
 - Create protal provide internal user UI to upload gift card data, and manipulte card load status by calling various web service.Use thymeleaf, js, Spring MVC, Spring Security.
- Create dashboard to real time card activation data on Global map
 - The application is to show user realtime transaction on Map,and total account compare with last HOUR/DAY/WEEK/YEAR
 - Create postpone logic to cache real data use Google guava. Use lealet to create map on brower, and use google Map API to get geolocation.
- Implement EGift Card Service for Staples.
 - Create project from scratch.
 - Implement EGift card deliver service use AWS SQS, REST, and interal Email Service API
 - Use Apache camel to handle work flow.
 - Release all features without any defect to production in 3 month.
- Refractory project
 - In case of Interval Framework issue,I refractory 4 project by myself Use Spring Boot + Spring Data + Spring MVC + Mongo + MySQL

Senior developer Apple

Apple

April 2015 - October 2015 • 6mos • Sunnyvale , CA

- Maintain support.apple.com
 - Fix defects in Application.
- Implement data pipeline
 - Implement various tool pull data from Solr search engine, HDFS, and Cassandra DB
- Analysis business data
 - Use Hadoop MapReduce to analyze the frequency of search query, which in support.apple.com
 - Implement solution to support multi-line JSON array list, while Hadoop 2.7 only support single line Json data
- Data parsing, and formatting
 - Implement solution to validate data.
 - Use Java/Python to create tool parsing daily log into businees report.

Java developer

Huawei

May 2014 - April 2015 • 11mos • Santa Clara , CA

- Develop Eclipse Plugin
 - Develop Eclipse Plugin UI using open source framework, such as EMF, JFace.
- Design XML driven application and tool
 - The final product of our project is XML driven application/webservice, Which is configurable and customizable.
- Implement Eclipse plugin runtime
 - The runtime is to use configuration then generate source code and deploy application automatilly.
 - Develop Component repository with Maven/FTP server/Nexas repository.
 - Auto-generate Maven pom, and auto-deploy by jenkins job.
- Use AngularJs, develop POC of Saas tool.

Java Developer

•Work on Property Management Application

- Implement front end use JSF , Primeface, Ajax,JavaScript
- Create webserice use REST,SOAP,Spring web flow.
- Implement DAO layer use JDBC and hibernate,Orcale
- Used multi thread to handle multiple request.Write Aspect log to handle all Exception and error
- Implement Unit test and automation test.

•Work on Healthcare.gov

- Fix defect in acquiring service
- Implement integration testing case..

Education:

University of Florida

Master , Information Systems and Operations Management

08-2010 - 04-2012 • 1yr 8mos

Dalian Maritime University

Bachelor , Business

09-2004 - 06-2008 • 3yrs 9mos

Featured Skills:

Spring : Spring MVC, Spring AOP, Spring Boot, Spring Data, Spring Retry, Spring Security, Spring LDAP, Spring Web Flow, Spring Batch
J2EE : REST, SOAP, JPA, Hibernate, JAXB, Jackson, Hibernate, Maven, Log4j, Logback
Front End : Thymleaf, Javascript, JSF, AngularJS, JQuery, Ajax, HTML
Database : Mysql, Oracle, Mongo
BigData : Hadoop MapReduce, Hive
Other : Linux, Unix, AWS, Shell script, python, Jenkins, Git, SVN
